## PROFESSIONAL SUMMARY

**Technical Product Builder** combining strong user-focused product thinking with deep technical expertise in **Software, Data, and AI/ML**. Demonstrated bias for action in leading initiatives, bridging engineering, design, and business strategy to deliver software solutions that drive measurable impact.

## CORE SKILLS

- **Product Management:** Product Strategy, User Research & Discovery, Roadmap Planning, Problem Definition, Analytics & SEO, Go-to-Market (GTM), A/B Testing, Figma, Google Analytics.
- **Technical Skills:** Python, C/C++, Java, JavaScript, TypeScript, SQL, React, Next.js, Firebase.
- **AI/ML & Data:** AI Agents, LLMs, NLP, Recommendation Systems, Prompt Engineering, AI Evaluation Metrics, TensorFlow, PyTorch, Scikit-learn.

## EXPERIENCE

### Kafumi — Founder & Product Lead

*August 2025 – Present*

 [kafumi.com](https://kafumi.com)

- Founded **Kafumi**, a **Full-Stack** cafe discovery platform featuring **70+ cafes**, built with **Next.js 14**, taking full ownership of ideation with data driven decision-making, go-to-market strategy, and UX design.
- Conducted primary user research and market validation through direct surveys and interviews with **B2C consumers and B2B stakeholders** to continuously align product features with user needs.
- Maintained a high-velocity agile development cycle with over **1,150 GitHub commits** to refine layout hierarchies, enhance visual affordances, and optimize the user experience.
- Engineered a mood-based **recommendation engine**, improving relevance by 50% using Levenshtein matching, multi-factor weighting, and geohash-based spatial ranking.
- Managed **post-launch product iterations** and user acquisition, analyzing **10+ growth metrics** alongside customer feedback to enhance marketing, SEO, and product strategy.

## PROJECTS

### \$pendr — AI-Optimized Budget Allocator

*Sep 2025 – Nov 2025*

- Drove product strategy and competitive research & analysis, translating insights into an AI-powered platform that dynamically distributed marketing budgets and optimized ad spend by up to 40%.
- Leveraged market insights to design an interactive ad simulation system allowing users to preview how ads appear across 10+ platform mockups, cutting creative iteration time by 30%.
- Created an AI scoring engine that evaluates ad content against 7+ performance criteria (copy quality, visual clarity, CTA strength), achieving 3× faster content validation, enabling data-driven optimization.

### Code Canvas — Algorithm Learning & Visualization Platform

*Jun 2026 – Sep 2026*

- Developed a local-first algorithm learning platform that organizes 20+ coding problems by failure patterns, techniques, and learning signals, enabling mistake tracking and personalized revision.
- Built an interactive visualization engine across 6+ algorithmic concepts, including Graphs, DP, Backtracking, and Binary Search, with step by step controls, trace timelines, and code to visual mappings.

## ACHIEVEMENTS & PUBLICATIONS

### Smart India Hackathon

*Aug 2025*

- Secured a top position nationally among **86,000+ entries**.

### Hacks MUJ

*Sep 2025*

- Secured **2nd place** by developing an AI-optimized marketing platform within a **36-hour** hackathon.

### International Conference on Smart and Distributed Computing

*Oct 2025*

- Published research on Comparative analysis of **Machine Learning and Deep Learning** models for Brain Tumor Segmentation.

## EDUCATION

### Manipal University Jaipur, Rajasthan, India

*Aug 2023–May 2027*

Bachelor of Technology (B.Tech), Computer and Communication Engineering

GPA: 8.52/10.0
